

Join LCI New England on **Tuesday, June 20, 2017** for a
**Hands-On Lean Training in
High Performing Teams and Pull Planning!**

Join Master's students from WIT's "Modern Construction Delivery Methods" class and fellow AEC professionals for hands-on Lean training in High Performing Teams and Pull Planning in a fast-paced, high-energy setting!

We will start with a discussion and exercise about how Lean provides an excellent framework for High Performing Teams. Then, after the break, we will learn about Pull Planning and practice Pull Planning in mixed teams.

Pull Planning is a typical first step in lean implementation on AEC projects in which project team members determine how work is handed off between companies and individuals to deliver milestones. Those with more experience – try your hand at facilitating a Pull Plan with LCI New England Community of Practice members standing by to assist.

In this workshop, you will learn how to (1) make handoffs explicit between workers, (2) experiment with sequencing alternatives, and (3) consider different production rates.

4:00 - 4:30 Registration / Networking
4:30 - 6:00 High Performing Teams – Presentation & Training
6:00 - 6:30 Dinner / Networking
6:30 - 9:00 Pull Planning – Presentation & Training

TUESDAY, JUNE 20, 2017

4:00pm to 9:00pm

WIT Beatty Hall

**Multipurpose Room 119, Ward St
Boston, MA 02120**

Register by 6pm on Thursday, June 15, 2017!

Late Registration will cost \$10 more and is subject to availability.
